

# PYTHON PROJECT REPORT

ATTAINU

SNAKE AND LADDERS

SUBMITTED BY

NAME: HIMANSHU KASHYAP

BATCH NAME: ACADEMY-NOVEMBER-2021

UNDER GUIDENCE OF: ANAND DIDWANIA

1. INTRODUCTION
2. KEY FEATURES
3. PYTHON FILE
4. LANGUAGE USED
5. FUTURE ASPECTS

1.Introduction: So basically, this is simple python game which we play for fun, and in this game, I have used some basic concepts like getting random numbers from list and generating some random numbers and all. I have used some ladder and snake concept in which whenever user land on any on these they will get some funny quote.

2.Key feature:

Starting welcome message: one welcome message will be shown in screen at starting of game in which some certain rules and basic play style of game would be provided.

User info: game will ask for players name

When game is started it will :

Roll the die

Will move player forward to certain value obtained in die

Ladders will boost player to higher number

Snakes will drop you to lower number

Some message will be shown on landing either of ladder or snake

3.Python file:

3.1: snake and ladder.py

3.2: readme

4.Language used: Python version 3.10

5.Future aspects: I will add png and convert game into table with some graphics.
